EDC

Advantage EDC Cloud is the core component of the Advantage eClinical Cloud platform and is an advanced and robust solution for data capturing, managing, cleaning, and reporting your clinical trial data. Advantage EDC was originally developed in 2000 from our more than 40 years' experience providing clinical trial solutions and has been used on more than 1000 studies. Advantage EDC Cloud takes our trusted solution to the next level with more modern cloudbased UIs and scalable and secure hosting capabilities.

EDC Features

- **Streamlined Study Build –** One location for all study build activities. Publishing tool allows mid-study changes and amendments to be deployed quickly without system downtime.

- **Simplified Data Entry –** A tablet-centric UI and autosaving improves a site's data entry experience in busy clinical settings. Several navigation modes allow users to easily export eCRF data for review and compliance.

- **Remote SDV –** Remotely verify site-entered data against source documents (or other electronic systems), identify discrepancies at the field level, and track through resolution. Automated resolution of discrepancy queries saves time by eliminating re-review.

- **Customized Approval Workflow –** Up to 3 permission controlled approvals per CRF allow data to be reviewed and extensively cleaned before trial end.

- **Remote Patient Visits –** Integrated video capabilities for remote visits between clinic staff and participants from their participant portal in a secure and documented manner.

- **Real-Time Visibility –** Visually track enrollment progress, query, and performance KPIs across sites. Visual cues to more easily identify site compliance issues. Pre-built interactive reports, charts, and data aggregations or build your own.

- **Unified Data –** Fully unified with Advantage EDC, enabling real-time data access, and a seamless experience in site patient management.

- **Unified Role Management –** User roles and access are managed once at the site level as part of a complete user profile across all platform applications.

EDC Benefits

Simplified Experience
Improve site experience with a single sign-on (SSO) and one click access to all applications within the Advantage eClinical Cloud.

Rapid Deployment
Reduce build times by removing redundant steps with a fully integrated study builder.

Better Data
Reduce data errors by removing messy, error-prone integrations and manual data transcription activities. Identify and resolve site compliance and data issues with real-time access to data and visual reporting.

Advantage eClinical Cloud

Advantage eClinical Cloud- the industry's first truly unified eClinical platform. A single application for patients, sites, CROs, and Sponsors to conduct clinical research. Simplifying how trials are managed, Advantage eClinical Cloud is putting the focus back on developing the next generation of treatments.
