

# RTSM

Advantage eClinical RTSM is a complete randomization and trial supply management solution enabling simpler and faster study conduct. The highly configurable and robust feature set supports a wide range of trial designs needs and complexities across any therapeutic area from CNS, Vaccines, Ophthalmology and more.

## What sets Advantage eClinical apart?

90+  
Countries

1K+  
Studies

3K+  
Sites

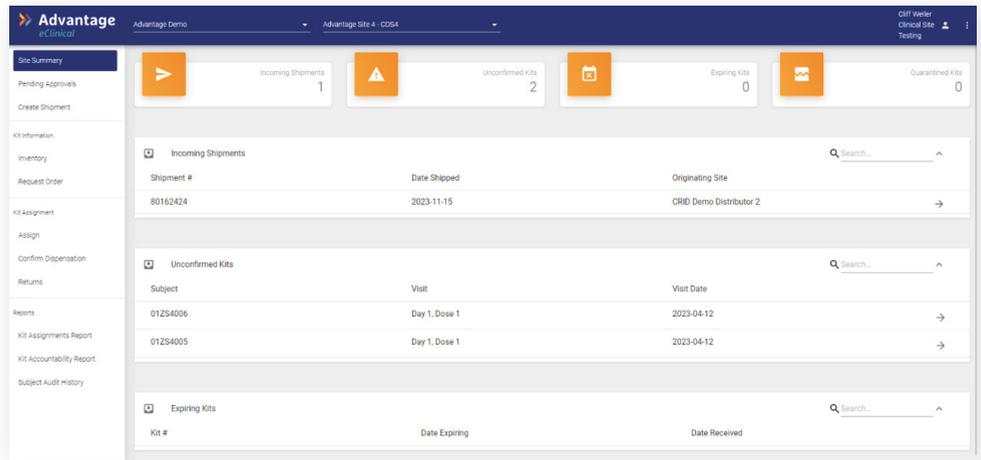

55K+  
Users

1M+  
Participants

## RTSM Features

- **Shipment and Inventory Tracking** – Complete inventory of assigned kits, their type, status, and expiration date provides visibility into supplies across all sites.
- **Real-Time Kit Assignment** – Assign kits in real-time based on randomization activities and a range of methodologies. Track visit dispensations for compliance purposes.
- **IMP Ordering** – Batch upload of kits with validation & support for study- specific fields, automated ordering based on site inventory, and pre-configured thresholds enables fast and efficient orders and approvals.
- **Unified Data** – Fully unified with Advantage EDC, enabling real-time data access, and a seamless experience in site patient management.
- **Unified Role Management** – User roles and access are managed once at the site level as part of a complete user profile across all platform applications.
- **Flexible Randomization** – Multiple randomization schemas available including static, stratified, permuted block etc. Study groups can be closed, opened, or expanded to closely monitor dose escalation.
- **Easy to Build** - Easily configurable, all through one UI, giving study designers the tools to create their own randomization table and schema all through the Study Builder tool.
- **Real-time enrollment validations**- Prevent data entry errors and unwarranted protocol deviations by configuring eligibility criteria validations during the enrollment process.

## RTSM Benefits

### Seamless Experience

Provide a more streamlined patient-centric experience with a single application and unified process for registration, enrollment, randomization, and kit dispensation.

### Efficient Operations

Reduce potential for both oversupply and undersupply meaning fewer wasted materials and fewer patients waiting for kit dispensation.

### Real Time Visibility

Ensures you know the current, up-to-date status of supply across all sites with real-time downloadable reports including kit assignment reports, and orders & shipments reports.

### Enhance Protocol Compliance

Ensures participants eligibility through screening data, and automates supply management to guarantee accurate kit dispensing.

## Advantage eClinical Cloud

Advantage eClinical Cloud- the industry's first truly unified eClinical platform. A single application for patients, sites, CROs, and Sponsors to conduct clinical research. Simplifying how trials are managed, Advantage eClinical Cloud is putting the focus back on developing the next generation of treatments.
